

Logistics & equipment

## mdss

**PERFECTLY STORED. FLAT OR ROTARY.**

Well-functioning in-house logistics have an impact on productivity. The Marbach Die Storage System (MDSS) storage systems from Marbach not only ensure that cutting-dies are stored safely and securely. They also ensure that they can be accessed at any time and are available just in time at the die-cutting machine. The MDSS storage systems are available in flat or rotary versions. They have a modular design and can therefore be configured flexibly to meet the respective requirements. MDSS: For best performance – before the cutting process even begins.
