

dieboards

duramar.

THE DURABLE ONE.

duramar dieboards are a combination of fibre-reinforced plastics and steel. Therefore they are not hygroscopic. They distinguish themselves with great dimensional stability and an extremely long life span. They are available in the variations eco, plus and performance. duramar dies convince through frequent reknives and excellent register accuracy. Even with large machine formats. For optimum creasing results.

very durable

absolutely precise

resistant to environmental factors
