

other

face shields

With the face shields* produced by Marbach, various professional groups with contact to the public such as doctors, medical staff, nursing home personnel, but also employees in pharmacies, supermarkets or delivery services can shield themselves from possible airborne droplets. Face shields also make sense in other areas where the required minimum distance cannot be maintained. This also applies to the production of a packaging manufacturer, for example when setting up knives.

We sell the face shields at the following conditions:

- Minimum order quantity: 50 pieces.
- Price for 50-99 pieces: 3,40 Euro/piece
- Price for orders over 100 pieces: 3,00 Euro/piece.

The prices are excl. VAT and excl. shipping costs. The current Marbach AGB apply.

* Mechanical shield against droplets in the air. Not a medical product.

If you are interested, please send an e-mail to: technik@marbach.com.
