solidplate|alu

THE LIGHTWEIGHT.

The proven solidplate dieboard as a lightweight: that's solidplate|alu. Its low weight makes it particularly advantageous for large folding box formats. It is very precise and thus ensures productivity and the best die-cutting results in packaging production. Furthermore, its design makes it lightweight and therefore easy to handle.

The solidplate|alu is used primarily for food packaging, but numerous other applications are also possible, such as in the pharmaceutical or cosmetics industries.

low weight

dimensionally stable
